- Role: Software engineer, Frontend, React dev, UI/UX, Data Analyst
- Strong understanding of React and its ecosystem
- Basic proficiency with Photoshop
- Excellent Hardware troubleshooting, repair and maintenance

PERSONAL SKILLS

- Strong problem-solving skills
- Strong oral and written communications skills
- Proven analytical abilities
- Highly organized and efficient
- Ability to work independently and as a part of a team and willingness to be hands-on
- Proven leadership skills and ability to motivate
- Excellent teamwork and adaptability in a fast-paced environment.
- Good project management skills

EDUCATION

Cavite State University | Cavite
Bachelor of Science in Information and Technology
Dean's List 2022-2023

EXPERIENCE

Data Analyst (internship wfh setup)
Singapore
March – April 2022

- Led and managed my team, taking charge by setting clear goals, delegating tasks, and providing guidance to team members.
- Analyzed specific information using DataScrapper and conducted quality checks after gathering the data together with my senior.
- Collaborated closely with team members and engaged in discussions with senior leadership regarding the project's status, seeking their opinions and advice.
- Proficiency in Excel, Google Sheets, and Web Scraping tools (DataScrapper, MeisterTask) for organizing and presenting data.

Restaurant Staff

2018 – 2021

- Balanced multiple tasks, exhibited flexibility in handling unexpected situations, and demonstrated the ability to work efficiently during busy periods.
- Patience and the ability to handle difficult customers and client gracefully.
- Active listening skills to understand customer, client's needs and preferences.
- Enhanced my communication skills through daily interactions with customers and team members.

PROJECTS/OPEN-SOURCE

Personal Website Portfolio and Projects

- Designed and launched a personal website portfolio showcasing various projects/SPAs, including an Online Ordering Website, Ecommerce platform, and Clone Website.
- Implemented responsive design principles to ensure optimal viewing experiences across devices.
- Conducted user testing to identify and address usability issues, ensuring a smooth and intuitive user experience.
- Debug errors, troubleshoot issues, and perform routine performance optimizations for speed and performance
- Developed applications using the Agile methodology.
- Creating wireframe, prototypes, mockups for web platform using Figma, lucidchart, and miro.
- Solving design problems and Improving Design's process by Design thinking approach.
- Integrating frontend with Rest APIs
- Stay plugged into emerging technologies, UI/UX and industry trends
